RE: Andalex Resources, Inc. "Centennial Mine" - Application for a Permit Revision,  
Sediment Basin B, Task ID No. 2641

Dear Sir or Madam:

This is in response to the Utah Division of Oil, Gas & Mining's (UT-DOGM) September 19, 2006, request for a decision, under 30 CFR 944.30, whether the above subject permit revision constitutes a mining plan modification.

Mining plan approvals by the Secretary of the Interior are required under the Mineral Leasing Act of 1920, 30 U.S.C. 181, *et seq.* before coal mining can occur on Federal lands. This letter serves to document OSM's determination whether or not a mining plan approval from the Secretary is required for the above permitting action.

OSM's review of the Application for a Permit Revision, Sediment Basin B, has determined that it proposes to eliminate Sediment Basin B and replace it with a parking area. In addition, the Application for a Permit Revision proposed to construct a new Administration building and Bathhouse in the vicinity of the Aberdeen mine portals at the Centennial Mine, Utah State permit C/007/019.

Based on a review of the activities associated with the permit revision, OSM has determined that the proposal does not meet the requirements of 30 CFR 746.18(d). Therefore, the proposed permit revision does not constitute a mining plan action requiring Secretarial approval.

OSM's decision was based solely upon the Federal regulations under 30 CFR PART 746 and not the technical aspects of the revision application itself. Consequently, OSM's decision does not relieve UT-DOGM from coordinating the review and approval of the Application for a Permit Revision, Sediment Basin B, with other Federal agencies for compliance with other Federal regulations.

OSM also electronically transmitted the September 19, request to the Bureau of Land

Management and the U.S. Forest Service for their review and comment.

In an electronic submittal dated September 20, 2006, the U.S. Forest service stated it had no comments or concerns with the permit revision.

The Bureau of Land Management did not provide any comments in the thirty day time frame established by the Federal regulations under 30 CFR 944.30, Article VI. D.

Please notify the applicant of our decision on this matter.

Should you have any questions regarding this letter or approval, please contact Carl R. Johnston, Utah Federal Lands coordinator, at (303) 844-1400, extension 1500.

Sincerely,

Ranvir Singh

RE: Consolidation Coal Company - "Emery Deep" Mine - Application for a Permit Revision,  
Incidental Boundary Change, Task ID No. 2646

Dear Sir or Madam:

This is in response to the Utah Division of Oil, Gas & Mining's (UT-DOGM) September 19, 2006, request for a decision, under 30 CFR 944.30, whether the above subject permit revision constitutes a mining plan modification.

Mining plan approvals by the Secretary of the Interior are required under the Mineral Leasing Act of 1920, 30 U.S.C. 181, *et seq.* before coal mining can occur on Federal lands. This letter serves to document OSM's determination whether or not a mining plan approval from the Secretary is required for the above permitting action.

OSM's review of the Application for a Permit Revision, Incidental Boundary Revision, has determined that it proposes to add 160 acres in Federal lease U-50044 to the permit area to allow for uninterrupted mining and the maximum recovery of coal reserves at the Emery Deep mine, Utah State permit C/015/015.

Based on a review of the activities associated with the permit revision, OSM has determined that the proposal does meet the requirements of 30 CFR 746.18(d)(3) and 746.18(d)(4). Therefore, the proposed Incidental Boundary Change permit revision does constitute a mining plan action requiring Secretarial approval.

OSM's decision was based solely upon the Federal regulations under 30 CFR PART 746 and not the technical aspects of the revision application itself. Consequently, OSM's decision does not relieve UT-DOGM from coordinating the review and approval of the Application for a Permit Revision, Incidental Boundary Revision, with other Federal agencies for compliance with other Federal regulations.

OSM also electronically transmitted the September 19, 2006, request to the Bureau of Land

Management and the U.S. Forest Service for their review and comment.

In an electronic submittal dated September 20, 2006, the U.S. Forest service stated it had no comments or concerns with the permit revision.

In an electronic transmittal dated October 19, 2006, the Bureau of Land Management stated in its opinion the permit revision did not constitute a mining plan action requiring Secretarial approval.

Please notify the applicant of our decision on this matter.

Should you have any questions regarding this letter or approval, please contact Carl R. Johnston, Utah Federal Lands coordinator, at (303) 844-1400, extension 1500.

Sincerely,

Ranvir Singh  
Manager, Northwest Branch

RE: Sunnyside Cogeneration Associates "Sunnyside Refuse & Slurry" Mine - Application for a Permit Revision, Excess Spoil Disposal Area #2, Task ID No 2644

Dear Sir or Madam:

This is in response to the Utah Division of Oil, Gas & Mining's (UT-DOGM) September 19, 2006, request for a decision, under 30 CFR 944.30, whether the above subject permit revision constitutes a mining plan modification.

Mining plan approvals by the Secretary of the Interior are required under the Mineral Leasing Act of 1920, 30 U.S.C. 181, *et seq.* before coal mining can occur on Federal lands. This letter serves to document OSM's determination whether or not a mining plan approval from the Secretary is required for the above permitting action.

OSM's review of the Application for a Permit Revision, Excess Spoil Disposal Area #2, has determined that it proposes to reconfigure the slopes of the spoil disposal area to increase storage capacity. In addition, the Application for a Permit Revision proposes to expand the existing Pasture Pond at the Sunnyside Refuse & Slurry Mine, Utah State permit C/007/035.

Based on a review of the activities associated with the permit revision, OSM has determined that the proposal does not meet the requirements of 30 CFR 746.18(d). Therefore, the proposed permit revision does not constitute a mining plan action requiring Secretarial approval.

OSM's decision was based solely upon the Federal regulations under 30 CFR PART 746 and not the technical aspects of the revision application itself. Consequently, OSM's decision does not relieve UT-DOGM from coordinating the review and approval of the Application for a Permit Revision, Excess Spoil Disposal Area #2, with other Federal agencies for compliance with other Federal regulations.

OSM also electronically transmitted the September 19, 2006, request to the Bureau of Land Management and the U.S. Forest Service for their review and comment.

In an electronic submittal dated September 20, 2006, the U.S. Forest service stated it had no comments or concerns with the permit revision.

The Bureau of Land Management did not provide any comments in the thirty day time frame established by the Federal regulations under 30 CFR 944.30, Article VI. D.

Please notify the applicant of our decision on this matter.

Should you have any questions regarding this letter or approval, please contact Carl R. Johnston, Utah Federal Lands coordinator, at (303) 844-1400, extension 1500.

Sincerely,

Ranvir Singh
